Abstract of JP2002084523

PROBLEM TO BE SOLVED: To variably control contents through metadata, where detailed information on the contents are described, to protect the right of the contents and to protect the right of a user individual and the like. **SOLUTION:** Metadata are added by respective contents. A contents-displaying method for a viewer, usage conditions, contents accumulation in a ciphered state, limited reception with respect to a terminal and limited reception with respect to the individual are made definable on a broadcasting side. The viewing control of the viewer, accumulation control, copying control and ciphering/ decoding control area performed, based on the definitions. Detailed control, with respect to the contents and the control of the contents display method to the user and the use condition, is conducted.
